

Dr. ELSA CATTANI

Italian National Research Council – Institute of Atmospheric Sciences and Climate (CNR-ISAC)
Via Gobetti 101, Bologna, Italy.

E-mail: e.cattani@isac.cnr.it

Phone: +39 639 8060

Employment

- 2007-present: Full-time researcher at the CNR-ISAC..
- 2000-2006: Contract researcher at the CNR-ISAC, Satellite Meteorology Group.
Title of the contract: A study of the radiative and microphysical cloud properties using new generation sensors.
- 1999: Grant holder at the CNR-ISA0, Satellite Meteorology Group.
Title of the grant: Methods for the atmospheric aerosol measurement by means of VIS and IR spaceborne sensors.
- 1997 and 1998: Grant holder at the CNR-IMGA, Remote Sensing Group.
Title of the grant: A study of the objective functions applied to the remote sensing (application to GOME measurements).

Research interests

- Clouds and rainfall regional climatology
- Satellite remote sensing of clouds and precipitation
- Blended IR-MW techniques for the precipitation estimation
- Radiative and microphysical cloud characterization from satellite remote sensing
- Radiative transfer models in the VIS-NIR-IR for cloudy scenarios

Education

- 1993: Degree in Physics, University of Modena, Italy.
- 2000: International Summer School on Atmospheric and Oceanic Sciences (ISSAOS), corso in “Remote sensing of atmosphere and ocean from space: Models, instruments and techniques”. Department of Electric Engineering and Department of Physics, University of L’Aquila, Italy.
- 2001: Remote Sensing Course, Prof. P. Menzel, University of Wisconsin (Madison). CNR, Bologna, Italy.

Membership in scholarly societies

- European Geoscience Union (member since 2010)
- American Meteorological Society (member since 2017)
- Associazione Italiana di Scienze dell’Atmosfera e Meteorologia (member since 2018)

Editorial Activity

- Associate Editor of Meteorological Applications (Sept. 2019 – present)
- Member of the Section Board for Remote Sensing of Water Cycle (2019 – present)
- Review editor of Frontiers in Atmospheric Science (Oct. 2013 – present)

International and National Projects

- 2019–present: Raincast – ESA AO/1-9324/18/NL/NA
A multi-platform and multi-sensor study to address the requirement from the research and operational communities for global precipitation measurements
- 2018–present: Copernicus Climate Change Service - Essential Climate Variable products derived from observations - ITT Reference: C3S_312b Lot 1
- 2014–2017: Global Earth Observation for integrated water resource assessment (earth2Observe)
EC funded collaborative project, 7th Framework Programme
- 2007 -2016: Satellite Application Facility on Support to Operational Hydrology and Water Management” (H-SAF)
EUMETSAT
- 2011 – 2012: A collaborative project aimed at pre-validation of a GMES Global Water Scarcity Information Service (GLOWASIS)
EC funded project, 7th Framework Programme
- 10/2007- 2011: Progetto pilota “Protezione civile dalle Alluvioni:il Nowcasting”
Project funded by Italian Space Agency (ASI)
- 2007 - 2010: Progetto Strategico “Nowcasting avanzato con l’uso di tecnologie GRID e GIS”
Project funded by Regione Puglia
- 2005 – 2007: Anthropogenic Aerosol Trggering and Invigorating Severe Storms – ANTISTORM”
STREP Project EC funded, 6th Framework Programme
- 2005: A microphysical retrieval package for cloud-aerosol in teractions using MSG-SEVIRI
EUMETSAT ITT 04/658
- 2002–2004: Critical Assessment of Available Radar Precipitation estimation Techniques and development of innovative approaches for environmental management – CARPEDIEM
Shared-cost project co-funfed by the Research DG of the European Commision, 5th Framework Programme
- 2001 – 2003: European satellite rainfall analysis and monitoring at the geostationary scale – EURAINSAT
A shared-cost project (contract EVG1-2000-00030) co-funded by the Research DG of the European Commission within the RTD activities of a generic nature of the Environment and Sustainable Development sub-programme (5th Framework programme).
- 1999 – 2006: Use of the MSG SEVIRI channels in a combined SSM/I, TRMM and geostationary IR method for rapid updates of rainfall

METEOSAT Second Generation Research Announcement of Opportunity (MSG-RAO) – ESA and European Organization for the Exploitation of Meteorological Satellites (EUMETSAT) (Project ID 152).

- 1999: Programma di ricerca applicata all'osservazione della Terra - Cartografia atmosferica: procedura d'inversione multi-strumento per la generazione di un prodotto aerosol-nubi-vapor d'acqua e sua validazione
Project funded by Agenzia Spaziale Italiana (ASI) and Ministero dell'Università e della Ricerca Scientifica e Tecnologica (MURST)
- 1997 – 1998: “Gome Cloud and Aerosol Data Products Algorithms Development”
ESA Contract 11572/95/NL/CN

Assistant supervisor of degree thesis

- 2001: Gian Luca Mercoli.
Doctor in Physics, Dept. of Physics, Università Statale di Milano
“Simulazione delle radianze nelle bande spettrali del visibile, vicino infrarosso e infrarosso del sensore SEVIRI a bordo di METEOSAT Second Generation in presenza di nubi per la meteorologia ed il clima”.
- 2004: Andrea Cucchi.
Doctor in Physics, Dept. of Physics, University of Bologna
“Caratteristiche microfisiche delle nubi nelle bande spettrali dei sensori satellitari di nuova generazione”.
- 2006: Francesco Venturi
Batchelor degree in Atmospheric Physics and Meteorology, Dept. of Physics, University of Bologna
“Retrieval di proprietà microfisiche delle nubi mediante tecniche satellitari multispettrali”.
- 2010: Alessandro Maffioli
Batchelor degree in Atmospheric Physics and Meteorology, Dept. of Physics, University of Bologna
“Caratterizzazione delle nubi e formazione delle idrometeore mediante sensori satellitari di ultima generazione”
- 2012: Claudia Acquistapace
Doctor in Physics, Dept. of Physics, University of Bologna
“Satellite-based VIS-IR multispectral screening of precipitating clouds: A case study during summer ay mid-latitude”
- 2013: Mario Corbani
Batchelor degree in Atmospheric Physics and Meteorology, Dept. of Physics, University of Bologna
“Identificazione delle nubi mediante sensori satellitari nel VIS-NIR-IR”

- 2015: Francesca Vittorioso
Doctor in Physics, Dept. of Physics, University of Bologna
An inter-comparison between a VIS/IR and MW satellite-based methods for cloud detection and classification”
- Diego Cerrai
Doctor in Physics, Dept. of Physics, University of Bologna
“Moisture and potential vorticity in Medicanes: theoretical approach and case studies”
- 2020: Olivia Ferguglia
Doctor in Physics of the Earth System, University of Bologna
“Analisi di tre prodotti di stima della precipitazione sull’East Africa e sull’Africa Australe”

Publications on peer-reviewed journals
