# Joint ENVIMAT and Cultural Property Protection Summer School 2020

## Tools and Strategies for Strengthening Resilience of Cultural Heritage in Climate Change

The online summer school is part of the EU Interreg Central Europe project STRENCH – Strengthening resilience of cultural heritage at risk in a changing environment through proactive transnational cooperation, which develops ready to use solutions for assessing climate change effects and protecting cultural heritage and cultural landscapes.

**Week 1** of the summer school introduces the topic of cultural heritage and its protection, featuring one short lecture per day.

**Week 2** is the main part of the summer school, focusing on climate change impact on cultural heritage, vulnerability assessment methodologies and climate modelling. The participants of the summer school acquaint themselves with the topic by means of theoretical lectures by international experts as well as practical exercises, focusing on case study analyses.

- > Online, hosted via Zoom
- > No course fee
- > In English language
- > 6 ECTS points may be granted for full participation in the programme
